Dharma Bahadur Budhathoki

Full Stack Developer

Swoyambhu , Kathmandu • 9803341639 • budhathokidharma8@gmail.com

in @ https://www.linkedin.com/in/dharma-bahadur-budhathoki-49315a230/ ○ @ https://github.com/Dharma001

Results-driven full-stack developer with 1+ years of work experience in Laravel, Vue.js, Tailwind CSS, JavaScript, and MySQL. Currently enhancing expertise in TypeScript, TypeOrm, Node.js, and React.js with TanstackQuery. Proven ability to build scalable applications with features like payment integration and real-time notifications. Strong communication and leadership skills, adept at collaborating with cross-functional teams and managing projects to deliver high-quality solutions.

EDUCATION

Bachelor of Science Honours (BSc.Hons) in Computing   Kathmandu

Islington College   Feb, 2022 - Dec, 2024

I have successfully completed my Bachelor of Science (Hons) degree at Islington College in Kathmandu, Nepal, an institution established in 1996. Throughout my studies, I actively engaged in various coursework and projects that enriched my academic and practical knowledge in the field. This program is affiliated with London Metropolitan University, ensuring a high standard of education and international recognition of my degree.

Higher Secondary Education (Management with Computer Science)   Kathmandu

Himalayan White House International Secondary School   Jan, 2018 - Mar, 2020

- Pursuing a curriculum that combines management studies with computer science to build a strong foundation in business principles and technological skills.
- Developing proficiency in programming, IT applications , along with critical business strategies.

PROJECTS

Task Management System

- Built a full-stack app with Next.js, TypeScript, and Redux Toolkit for state management.
- Developed the backend using Node.js, Prisma ORM, and PostgreSQL on AWS RDS.
- Deployed frontend via AWS Amplify and backend on EC2 Linux, secured with API Gateway (HTTPS).
- Gained hands-on experience in AWS cloud services and end-to-end development.

Real-Time Chat Application

Tech Stack: Next.js, TypeScript, Redis (Upstash), Pusher, Google Auth
- Developed a responsive chat app using Next.js for seamless routing and server-side rendering
- Implemented real-time messaging with Pusher for smooth, instant interactions
- Utilized Redis for efficient backend data handling
- Integrated Google Authentication for secure and easy logins
- Ensured code quality with TypeScript for maintainable and bug-free development

Project Demonstration: https://www.linkedin.com/feed/update/urn:li:activity:7254928592051085312/

TwitterClone (Practice Project)

TwitterClone (Practice Project)
Technologies Used: Node.js, Express.js, MySQL, Prisma, React.js, TypeScript
Overview: Developed a full-stack Twitter-like app to showcase scalable web development skills, leveraging modern tech and clean architecture.
Key Features:
- Secure Login: Google OAuth integration
- Real-Time Interactions: Live notifications for tweets, retweets, likes, and mentions
- Dynamic Tweeting: Post, reply, like, and retweet

- User Profiles: Customizable profiles, follower/following counts
- Search & Trends: Explore trending topics and search users
- Responsive Design: Optimized for all devices

Objective: Demonstrated adaptability, fast learning, and problem-solving through building a complex, scalable app. Ready to tackle new challenges and innovate.
